

EyeScreen Photographic Examination

Drs. Miller, Bose & Schwartz are pleased to provide their patients with an advanced digital retinal exam called EyeScreen. EyeScreen is a high resolution screening photograph of your retina which will help us document, review, and compare your retina over time. We will use the EyeScreen Exam to document your retinal image for our charts, screen for eye diseases and improve our ability to view your internal retinal health at a much higher resolution than a slit lamp or ophthalmoscope.

Drs. Miller, Bose & Schwartz are concerned about retinal problems such as macular degeneration, glaucoma, retinal holes, detachments and diabetic retinopathy (all of which can lead to partial loss of vision or blindness). Additionally, many symptoms of systemic diseases such as diabetes, the effects of high blood pressure and other diseases can be detected with the EyeScreen Examination.

You can expect from this exam:

- An annual eye wellness EyeScreen photograph
- An in depth view of the retinal surface (where eye diseases first manifest)
- The ability to review the images with you (we will show you your retina)
- A permanent record for your medical file, for serial analysis, comparisons and diagnosis
- To be fast, easy and comfortable

Since insurance will not pay for the EyeScreen Exam or any retinal image unless eye disease is present, the EyeScreen Examination is an out-of-pocket expense.

Drs. Miller, Bose & Schwartz recommend this procedure for all of their patients and will perform the EyeScreen Exam at an additional cost of \$45.00. Please select one of the following boxes:

- I AGREE** to have my retinal health evaluated with the EyeScreen Exam
- I DO NOT AGREE** to have the Retinal Photographic Exam.
